

Bringing

HOPE

to patients with depression

Hope is knowing remission from depression is possible

Depression is a serious illness that affects approximately 14 million Americans.¹ While medications may help manage symptoms, many patients are not satisfied with the results they get from standard drug therapy. NeuroStar TMS Therapy[®] is a novel approach to achieving remission in depression that is bringing new hope to patients every day.

“I can’t begin to tell you what a difference TMS has made in my life. I am just so much happier.”

- Susan, 58 years old, Minnesota

NeuroStar TMS Therapy for depression

- FDA-cleared for patients who have not benefited from one prior antidepressant medication²
- Free from side effects often associated with antidepressant medications²⁻⁴
- Safe, effective therapy that can be conducted right in the doctor’s office²

Hope with a proven, non-drug therapy

NeuroStar TMS Therapy® uses highly focused magnetic pulses to stimulate areas of the brain that may be underactive in patients with depression.

- Magnetic pulses target key areas of the brain²
- Technology is similar to that of magnetic resonance imaging (MRI)
- Each in-office treatment takes 37 minutes
- Patients receive therapy 5 days a week, for 4 to 6 weeks
- During treatment, patients are awake and alert; they can go back to their normal activities immediately afterward

NeuroStar TMS Therapy[®] is safe and effective

Many patients experience
significant benefits⁵

- 1 in 2 patients improved significantly
- 1 in 3 patients were free of depression symptoms

“Seven months ago, I was so depressed I wasn't able to function. After six weeks of NeuroStar TMS Therapy, I was back to work; I was feeling great; I was enjoying my kids again and I had my life back.”

- Craig, 38 years old, Pennsylvania

Demonstrated track record
of experience

- Clinically proven in multiple trials with 800 patients with depression⁵⁻⁷
- More than 12,000 patients treated⁴
- Nearly 500 NeuroStar physicians provide therapy across the US⁴

Is NeuroStar TMS Therapy[®] right for you?

If you answer agree to any of these questions, ask your doctor about NeuroStar TMS Therapy.

- Depression symptoms have interfered with my daily life.
 Agree **Disagree**
- I am not satisfied with the results I get from depression medication.
 Agree **Disagree**
- I have had, or have worried about, side effects from depression medication.
 Agree **Disagree**
- I have switched medications for depression due to side effects.
 Agree **Disagree**
- I am interested in a proven, non-drug therapy for depression.
 Agree **Disagree**

Remission from depression is possible.

Talk to a NeuroStar physician today.

Indication

NeuroStar TMS Therapy® is an FDA-cleared, non-drug treatment for patients with depression who have not benefited from one prior antidepressant medication. NeuroStar TMS Therapy is only available by prescription. A doctor can help decide if NeuroStar TMS Therapy is right for you.

Important Safety and Efficacy Information

NeuroStar TMS Therapy should not be used with patients who have non-removable conductive metal in or near the head.

The most common side effect is pain or discomfort at or near the treatment site. There is a rare risk of seizure associated with the use of TMS. You should talk with a NeuroStar physician to determine if TMS Therapy may be right for you.

In a controlled trial, patients treated with active NeuroStar TMS Therapy received greater than 3 times the improvement in depressive symptoms compared to placebo at four weeks (MADRS, -7.1 vs -2.1, $P=0.0006$).⁸
